

Environmental Policy Statement

At FastAnt, every member of our organisation shares environmental awareness

FastAnt regards the protection of our environment as a key part of our business philosophy.

To this end we operate systems to ensure not only compliance with relevant environmental legislation and requirements which relate to the company's environmental aspects, but also to minimise and wherever possible prevent, the risk of environmental harm arising from accidental emissions or discharges.

In pursuing this aim we seek to be efficient and effective in the use of natural resources including energy, to minimise the waste we produce through adoption of good operating practices and through the promotion of recycling.

Through an ongoing review of our processes we endeavour to reduce or eliminate in volume the levels of any potentially harmful substances we may use, and where such actions are not possible, to ensure their proper storage and disposal.

As an integral part of our local community we recognise our responsibilities to others and seek to act accordingly so that our operations can be conducted in a manner that is acceptable to our neighbours.

As part of the wider business community we aim to work with our customers, suppliers and subcontractors to both strengthen our environmental performance and where appropriate to assist them to achieve their own environmental goals.

Our commitment to this Environmental Policy Statement is underlined by our development of a company Environmental Management System through which we can pursue the goal of continual improvement.
